Competences

- Pack Microsoft Office
- Creativity
- Organisation
- Serious

Area of interest

- Reading
- Travel
- Sport

Summary

Licensed physicist with a Master's degree in Geographic Information Systems (GIS), proficient in industry-leading GIS software, including ArcGIS and QGIS. Skilled in managing databases and utilizing SQL for efficient data handling. Proficient in Python programming for geospatial analysis and automation.

Education

- 2018 – 2021 **Bachelor of Physics** Université Mohammed V De Rabat
End-of-study project on thermal performance of a solar greenhouse converted into a solar dryer:
 - Design of the solar dryer.
 - Carry out experimental tests.
 - Energy calculations.
- 2022 – 2024 **Master RS/GIS, Dual Diploma** Université Mohammed V De Rabat
 - Introduction to GIS software ARCGIS, QGIS, ARCGIS Pro.
 - Image processing with ERDAS Imagine, ENVI.
 - Spatial data analysis.
 - Python, R, MySQL.
- 2022 – 2024 **Master Remote sensing/GIS, Dial Diploma** CRASTE-LF affiliated to UN
 - Introduction to GIS software ARCGIS, QGIS, ARCGIS Pro.
 - Image processing with ERDAS Imagine, ENVI.
 - Spatial data analysis.
 - Python, R, MySQL.

Work Experience

- Jan 2022 -- Jul 2022 **Customer Consultant**
UX Centers, RABAT
 - Guarantee the achievement of quantitative and qualitative project objectives.
 - Offer a multitude of products.
 - Advise customers by telephone.
- Mar 2024 -- Nov 2024 **Intern**
Pôle Digital de l'Agriculture, de la Forêt et Observatoire de la Sécheresse, RABAT
 - Geostatistical analysis of meteorological data.
 - Drought Analysis.
- December 2024 -- Now **GIS and Remote Sensing Developer**
Pôle Digital de l'Agriculture, de la Forêt et Observatoire de la Sécheresse, RABAT
 - Designed and maintained PostgreSQL/PostGIS spatial databases to efficiently store and manage large volumes of meteorological and remote sensing data.
 - Prepared technical reports and presentations summarizing findings and recommendations for drought mitigation strategies.
 - Created automated Python and R scripts for acquiring, processing and analyzing satellite imagery to monitor vegetation health and drought conditions.
 - Developed an interactive geoportal dashboard using R Shiny to visualize and analyze real-time drought indices, meteorological data and meteorological predictions.
 - Deployed web map applications on Linux servers using web server NGINX and managed cloud infrastructure AWS for scalable geospatial data processing and application hosting.

TRANKIL Reda

GIS Developer

Technical Skills

-  ArcGIS & ArcGIS Pro
-  QGIS
-  PostgreSQL/PostGIS
-  Python & R
-  AWS & Linux

Expertise

-  Geospatial Analysis
-  Remote Sensing
-  Spatial Databases
-  Data Visualization

Certificats

Oct 2023	Imagery in Action	Esri
Feb 2023	ChatGPT : Artificial intelligence Platforms, Opportunities and Challenges	ICESCO
Jul 2024	Winner Reboot the earth Hackathon	FAO, UN
Apr 2025	TOP 3 Winner Tiny Shiny Hackathon	Appsilon

Skills

Programming	R, Python, C & MySQL.
Technologies	FastAPI, & MySQL.
GIS Skills	QGIS, ArcGIS & ArcGIS Pro
Image Processing	Envi & Erdas Imagine
Data Science	Machine learning, scikit-learn, SVM & random forest
Databases	PostgreSQL, PostGIS, SQL
Version control	GIT and Github
